### 1918, figures made public today by the STOCKS STRONG, ALMOST LIBERAL RECEIPTS GIVE TO POINT OF BUOYANCY

New York, Dec. 5.—Stocks were strong, almost to the point of buoyancy, at the opening of today's stock market on the news that the department of justice had decided not to appeal the Southern Pacific oil land cases recently decided against the government. Southern Pacific, which closed yesterday at \$5%, opened with a lot of 20,000 shares at 104 to 108, followed by numerous lots of 100 to 500 shares at 101 to 109. Subsequently sales were made at 106 to 107. Southern Pacific convertible 5 per cent bonds opened at 107, soon advancing to 108%, against yesterday's final price of 100. The general list, especially oils, motors, steels and equipments, rose 1 to 2 points, with a general extension of gains within the first half hour.

The closing was irregular; sales approximated 1,000,000 shares.

The market settled down to its recent dull routine at midday with rallies of 2 to 3 points in General Motors, Crucible Steel and the more representative oils. Shippings and Columbia Graphophone featured the stronger stocks, but equipments and leathers were comparatively heavy.

NEW YORK STOCK LIST. Amounted to \$508,145,759, a decrease of \$107,000,000.

An increase of nearly \$300,000,000 in federal reserve notes for the year was shown. Federal reserve bank notes in circulation increased approximately \$175,000,000. ## **HEAVY TONE TO CORN**

Chicago, Dec. 5.—Fairly liberal receipts and a limited demand gave a heavy undertone to the corn market today and prices were generally lower. Opening prices, which ranged from unchanged to 1/2 lower, were followed by declines. On the dips May touched \$1.32.

Oats followed the course of corn, but within narrower limits. Lower live hog prices were reflected in decreased provision values.

Liverpool sales increased to 14,000 bales.

The weather map shows light showers in the western belt and dry weather in the eastern. Temperatures generally are slightly below normal.

The coal situation is getting worse and industrial plants here and there are beginning to close. The Mexican situation is acute and almost anything may happen in connection with it. Villa is reported captured by his own men. A thousand December notices were issued in New York yesterday and were stopped by southern spot interests. Ocean freight rates are easier on cotton shipments.

Gwathmey, New York, wires: "We strongly advise transferring January shorts to the later months."

The Bank of England rate is unchanged at 6 per cent.

The market is inclined to sag in absence of special news of bullish character.

GRAIN

Chicago, Ill., Dec. 4.—Early selling by many late buils broke corn yesterday and the market failed to regain a firm tone. The grain situation, however, shows no positive change beyond the promise of some extra corn receipts. Neutrals are buying oats and they do not require credit for such purchases. Secretary Glass' announcement is a long distance weight on the grains. Right now the coal situation indicates that when the mines do start a big rush of coal will be on and the corn movement cannot assume any large groportions until January. There are no immediate signs of a coal crisis but of course the real argument can only be one to four days away. This suggests a peculiar market in which bulge realizing due. Broker houses line up in favor of break purchases and see no weakness in the oat situation.

Selling of corn is on expectation of easier cash corn prices.

## EASY CABLES CAUSE

New York, Dec. 5 .- The cotton market opened easy at a decline of 25 to 50 points in response to relatively easy the crop at 11,200,000 bales, excluding linters and ginning to Dec. 1, at 9,000,000. These crop figures were the
heaviest so far published and led to
a good deal of commission house liquidation, but trade interests were buyers
while there was an active demand from
Liverpool and brokers with Japanese
connections around 25.45c for January
and 32.38 for May. This checked the
decline and caused railies of 25 or 30
points from the lowest.

January sold up to 37.04c later in the
morning, or 10 points net higher on
covering and buying, encouraged by
more optimistic reports of the coal
situation. Later months did not fully
recover their early losses, however, and
the market was unsettled at midday,
with January selling around 35.78c and
May \$2.33c, or about 15 to 45 points net

New Orleans, Dec. 5.—A private ginning estimate of 2,000,000 bales produced to the first of December, pointing to a crop of 11,140,000 bales, caused heavy selling of cotton on the opening of the contract market today. In the first half hour of business prices fell 47 to 52 points.

At a level 47 to 56 points down early sellers started buying covers in order to realize profits and they caused small recoveries. Toward noon the market was at net losses of 23 to 35 points.

### A Complete Food

Many health-giving foods are lacking in pleasant flavor.

Many savory dishes are lacking in health properties and some are positively injurious.

Puritan Hams and Bacon are energy builders in the highest degree and each affords a delightful relish distinctively their own.
